

WOODGRAIN FINISHES FOR WINDOWS & DOORS

custom-made for your home

woodgrain finishes for windows and doors

Windows and doors with a woodgrain finish can give you the look and feel of real wood, but without the ongoing maintenance associated with stains and varnish.

Whatever the exterior finish of your home, be it brick, stone, render or timber there is a woodgrain to suit its character. Choose from the natural tones of Irish Oak, Golden Oak and Rosewood with their realistic woodgrain patterns and textured finish, or the freshly painted look of black, white or cream with a subtle woodgrain texture.

The range of woodgrain finishes has been specifically chosen to cater for almost any taste, many with woodgrain for the outside and a smooth, bright white finish for the inside. This will help to make the most out of your internal light, will blend with almost any room decor and will always look fresh and clean. It even matches the most popular shade of white gloss paint.

Choosing the right woodgrain finish is a very personal choice but we are happy to provide advice and guidance in helping you make the right decision.

Adding character to your windows and doors

Doors

Selecting the right door design can make a real difference to the look of your home. Our flexible range allows you to vary the height of midrails, add extra mullions and we've even got matching panels to fill solid areas.

Mechanical joints

For added realism and that look of real craftsmanship, you can specify the transoms and mullions used in doors to have a mechanical joint.

Glass

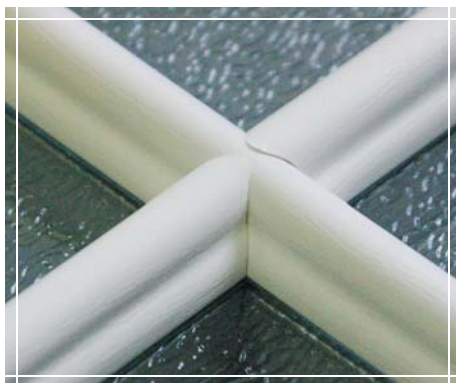

Choose from a wide range of glazing options to finish your window and door frames. There is obscured glass for privacy, intricate lead and colour designs for individuality, and energy rated glass to help keep you warm inside and save on heating bills. We will, of course, make sure that you and your family are safe by fitting toughened glass to all doors and high risk areas.

Georgian bars and lead

Make a feature of any window frame and glass with 20 or 28 mm authentic Georgian bars fitted to both sides of glass units that blend with the frame, or Georgian bars that are fitted inside the glass units making cleaning of glass an easy affair. You can also replicate lead windows with either diamond or square patterns.

Mock sash horns

Re-create the look of traditional sliding box-sash windows popularised in the Victorian and Edwardian era using a casement window fitted with a special top-hung sash that has authentic looking 'horns'.

Colour-matched hardware

A standard range of finishes to furniture such as handles, hinges and letterplates have been chosen specifically for each woodgrain finish. You can always choose your own finish from either polished gold, polished chrome, white or black.

The images, descriptions and performance standards contained in this brochure are accurate at the time of printing, however please be aware that specifications may change without notice. Every effort has been made to reproduce woodgrain colours shown in this brochure as closely as possible. Unfortunately, due to limitations of printing processes an exact match cannot be guaranteed and colours may vary slightly.
